Signed _____ Date _____

Chairman,

Department of surgery and Anaesthesia

NOTES

The objectives of the senior clerkship in ophthalmology in the MBChB and IT course year V is to impart on the student, the knowledge and skills to adequately diagnose, manage and prevent ophthalmological diseases.

The objective of this practical record book is to ensure the student has attained the necessary clinical skills and acumen to attain the course objectives.

The record book has three levels of expectation from the student. For the basic procedures expected of the medical graduate, the student will be expected to personally perform the procedures under supervision. Some procedures will require that the student assists the primary clinician in undertaking them. By assisting the student will be expected to understand the basic science principles behind the procedure, the anatomical/ physiological changes being attained and any other medical principle reviewed. For complex surgical interventions that would require more expertise, the student is expected to witness the procedure and question the primary physician on the procedure.

The student shall also be expected to be part of a group of a maximum six students who prepare a case presentation during a ward round. The presentation must include three levels- history and examination of the patient, diagnosis and investigation of the patient both ideal and present; and an academic discussion surrounding the case.

To attain all the above clinical skills and build management hierarchy for ophthalmologic disease, the student will be expected to comprehensively take the case history and clerk at least five, (5), ophthalmology cases and present them to a lecturer/ consultant ophthalmologist submit weekly write ups. This will develop the skills of history taking, physical examination and clinical diagnosis that is key for any clinician.

The log book is to be signed by the supervising clinician immediately after completion of the procedure and to be handed

D. DETAILED WRITE-UPS.

over weekly to the chair department of surgery for verification and audit. The log book shall remain a prerequisite to sitting the end of rotation CAT and end of year examination.

This book will form an integral part of our progressive assessment mark. Your continuous assessment test mark shall be a weighted composite of end of rotation CAT marks, this logbook, attendance statistics and presentations made during ward rounds, tutorials and grand rounds. It is therefore imperative you give it the due diligence required. In the event a particular procedure requiring the student to undertake personally or participate in is not performed or available during the rotation, this should be clearly indicated. A SECTIONAL 30% PENALTY WILL BE AWARDED FOR OBVIOUS FORGERIES. INCLUDED HERE ARE LOGBOOKS SUBMITTED FOR THE FIRST TIME DURING THE LAST WEEK OF THE ROTATION.

Weekly review of logbook by department. Books must be handed in on Friday by 5:00pm and collected the Monday following. Ensure feedback on your progress is indicated within the logbook. This will be used as a monitor of clinical work for that week, it will be recorded and a mark awarded. Marks will only be awarded for signed procedures and final mark for your logbook will include weekly marks allocated. Random authentication of logbook entries will be carried out.

- A. CLERKSHIP RECORD Clerkship logbooks are to be downloaded from the website at the start of each rotation. It is your responsibility to keep it safely. Evidence of involvement in complete patient management with the conditions indicated below must be achieved.

A. CLERKSHIP.

Each student is expected to clerk 5 patients either in the ward or in the eye clinic and discuss their management.

Patient number	Patient initials	Sex	Age	Diagnosis	Signature

B. PROCEDURES TO BE UNDERTAKEN BY STUDENT.

Each student is expected to perform 3 fundoscopies and discuss their findings.

Patient number	Patient initials	Sex	Age	Diagnosis	Signature

C. PROCEDURES TO BE WITNESSED.

Each student is expected to:

- To observe instillation of topical medications to 3 patients
- To observe procedure of fluorescein staining to 3 patients
- To observe procedure of subjective refraction on 3 patients
- To observe measurement of intraocular pressure on 3 patients

C1. TOPICAL MEDICINES INSTILLATION.

Patient number	Patient initials	Sex	Age	Diagnosis	Signature

C2. FLUORESCEIN STAINING
